

Tucson, AZ Botox Injections

Laser 1

When fine lines or wrinkles become a problem, Laser 1 offers the most reliable muscle relaxing treatments to soften their appearance and in many cases make them disappear. Often referred to as Botox, Botulinum Toxin Type A is a neurotoxin produced by the bacterium Clostridium A. When injected, it can relax the muscles on areas of the face and neck which cause wrinkles associated with facial expressions. Treatment with Botulinum Toxin Type A can cause your facial expression lines or wrinkles to soften and in many cases disappear.

Areas Most Frequently Treated with Botulinum Toxin Type A Include:

- Glabellar area of frown lines - located between the eyes
- Crow's feet - lateral area between the eyes
- Forehead wrinkles

Botulinum Toxin Type A Treatments Include:

- Botox®
- Dysport®

Botulinum Toxin Type A is diluted to a very controlled solution and when injected into the muscles with a very thin needle, it is almost painless. Clients may feel a slight burning sensation while the solution is being injected. The procedure takes about 15-20 minutes and the results last three to six months.

Call Laser 1 today at (520)721-1117 to schedule an appointment for a free consultation. If you have any other questions or comments, please [contact us](#).
